

The **Vine** Projects

Introduction

About TheVine Projects

Founded in 2022 by Francois Drotsky, TheVine Projects boasts over 8 years of dedicated experience in landscaping. As an experienced subcontractor, The Vine Projects has proficiently completed a variety of projects, spanning both corporate establishments and private gardens.

Transformative Landscaping Installations

At The Vine Projects, we specialize in crafting outdoor spaces that captivate and inspire.

Our comprehensive range of services includes:

- Berm Construction
- Drainage solutions
- Exposed Concrete Walkways
- Ground work
- Irrigation
- Lawn Installation and establishment
- Ponds Construction
- Staircases

At TheVine Projects, our completed projects showcase our expertise in various landscaping endeavors, from precision concrete work to the creation of serene ponds and rock staircases.

Mission Statement: Creating Joyful Environments

At TheVine Projects, our mission is to accompany our clients every step of the way, ensuring their complete satisfaction and a genuine love for the transformative work we do. We are committed to crafting and nurturing beautiful environments that reflect the unique visions of our clients.

Vision: Elevating Landscaping's Significance

We envision landscaping not merely as an accessory but as an indispensable and value-adding element to all construction projects. Our commitment to innovation, sustainability, and aesthetic excellence aims to set high standards, making landscaping an integral and essential aspect of every project.

Core Values: Commitment to Excellence

- **Productivity:** Maintaining high levels of efficiency and timeliness.
- **Excellence in Service:** Striving for perfection in every project.
- **Customer Satisfaction:** Putting clients' happiness at the forefront.
- **Integrity and Transparency:** Operating with honesty and ethical practices.
- **Team Collaboration:** Fostering cohesive teamwork.

At TheVine Projects, our completed projects reflect our commitment to quality, innovation, and the seamless integration of nature into the built environment.

Partner with us to transform your outdoor spaces into breathtaking havens.

Sustainability Practices at The Vine Projects:

At TheVine Projects, we are committed to incorporating sustainable practices into our landscaping endeavors, recognizing the importance of environmental responsibility.

Here are some key sustainability practices integrated into our projects:

— **Native Plant Selection:**

Emphasis on utilizing indigenous and water-wise plant species that are well-adapted to the local climate. Enhances biodiversity and promotes ecological balance.

— **Water Conservation:**

Implementation of water-efficient irrigation systems to minimize water usage. Utilization of smart irrigation technologies for precise and efficient watering.

— **Soil Health Management:**

Incorporation of organic matter into the soil to improve fertility and structure. Application of sustainable soil management practices to promote long-term soil health.

— **Rainwater Harvesting:**

Integration of rainwater harvesting systems to collect and store rainwater for irrigation. Reduces reliance on municipal water sources and contributes to water conservation.

— **Education and Awareness:**

Client education on sustainable landscape maintenance practices. Promotion of eco-friendly habits to ensure the longevity and health of the landscape.

By integrating these sustainability practices, TheVine Projects not only aims to create aesthetically pleasing outdoor spaces but also strives to contribute positively to the environment.

We believe that responsible landscaping is an integral part of building a sustainable and harmonious future.

The**Project** work

Corporate client

Hollard Insurance

Appointed subcontractor

Exposed Concrete Walkways

- Design and leveling of walkways, starting with foundations and thorough compaction.
- Implementation of shuttering steel edges for concrete walkways.
- Expert pouring of concrete, followed by floating levels, and using chemicals to achieve an exposed concrete finish.

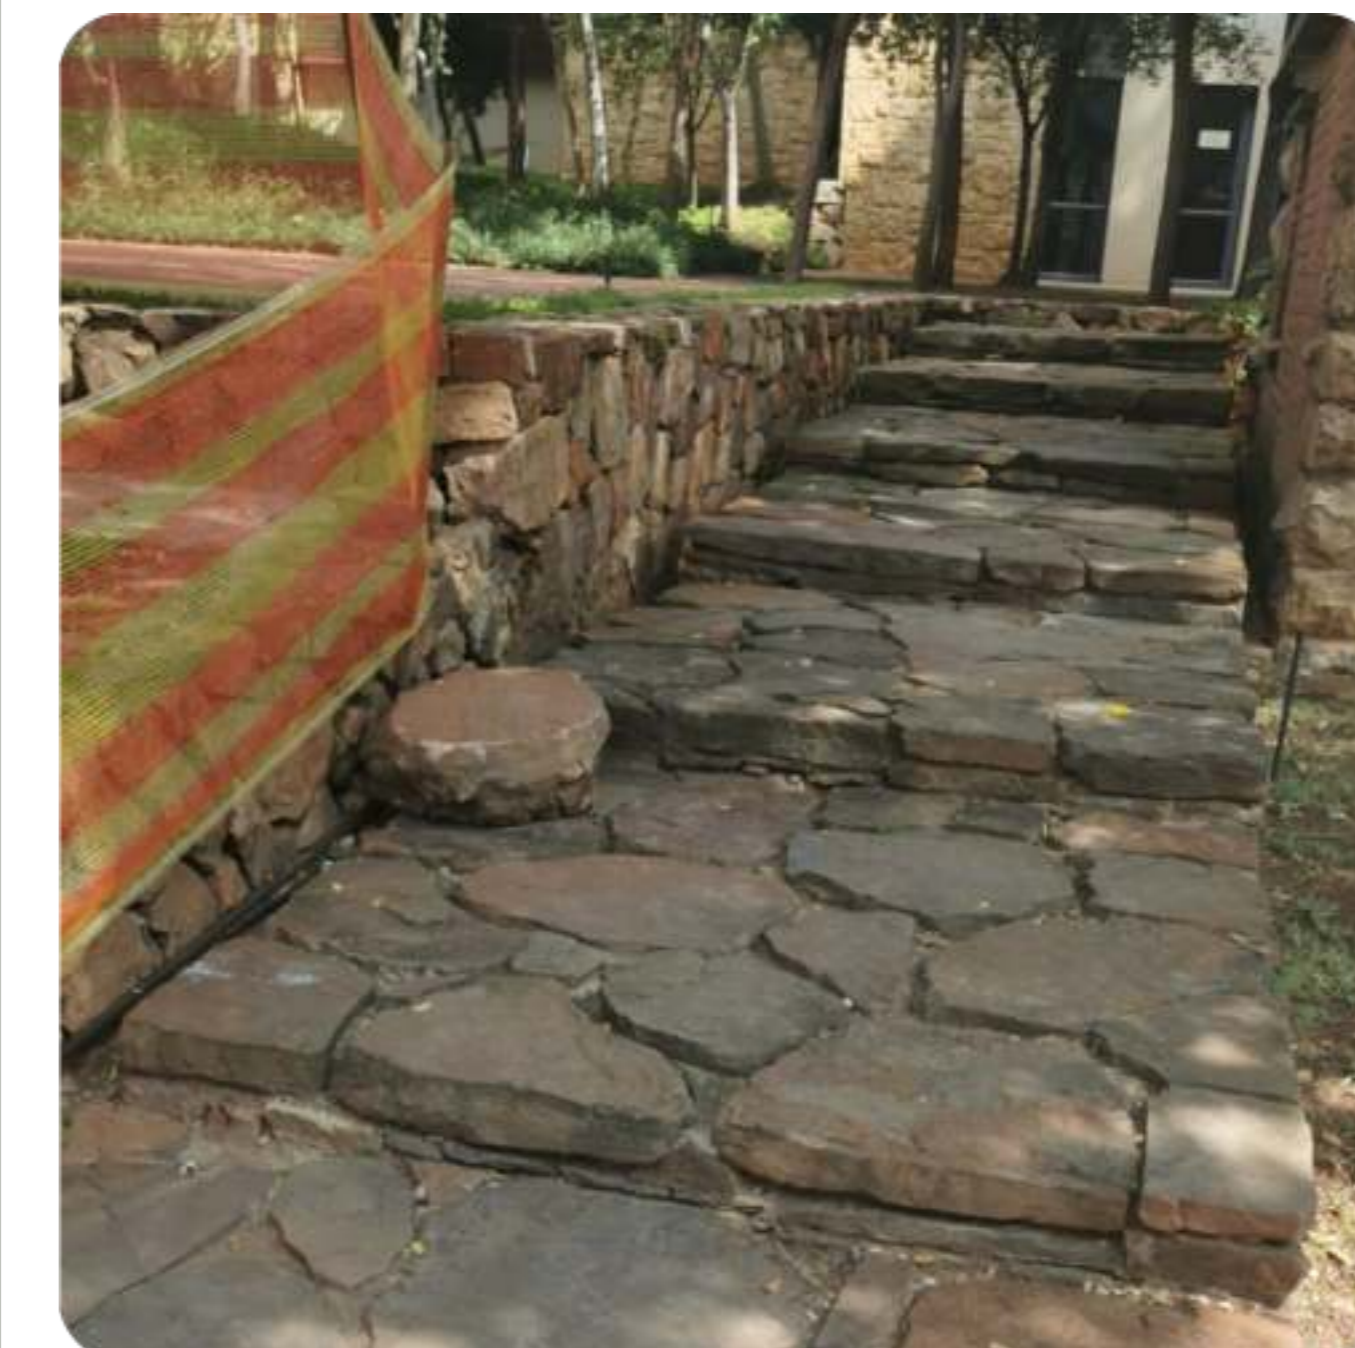

Building Pond

- Excavation of pond levels, and ensuring proper compaction of the structure.
- Installation of a high-quality bentonite liner to effectively seal the pond.
- Backfilling of soil into the pond, followed by compaction and shaping to realize the desired pond design.

Rock Staircase

- Detailed calculation of staircase length, width, and height for precise construction.
- Pouring of a solid foundation for the staircase.
- Construction and completion of the rock staircase with a focus on durability and aesthetic appeal.

Private client

Waterkloof Garden

Appointed subcontractor

Half circle shaped berm

- Design and leveling of a walkway, considering maintenance around the berm and water levels.
- Creation of a half-circle berm, offering an aesthetically pleasing and functional lawn feature.

Lawn planted around pond

- Strategic planting of instant lawn on berms with soilsaver cloth to prevent soil erosion.
- Thoughtful landscaping around the pond, enhancing the visual appeal with a well-maintained lawn

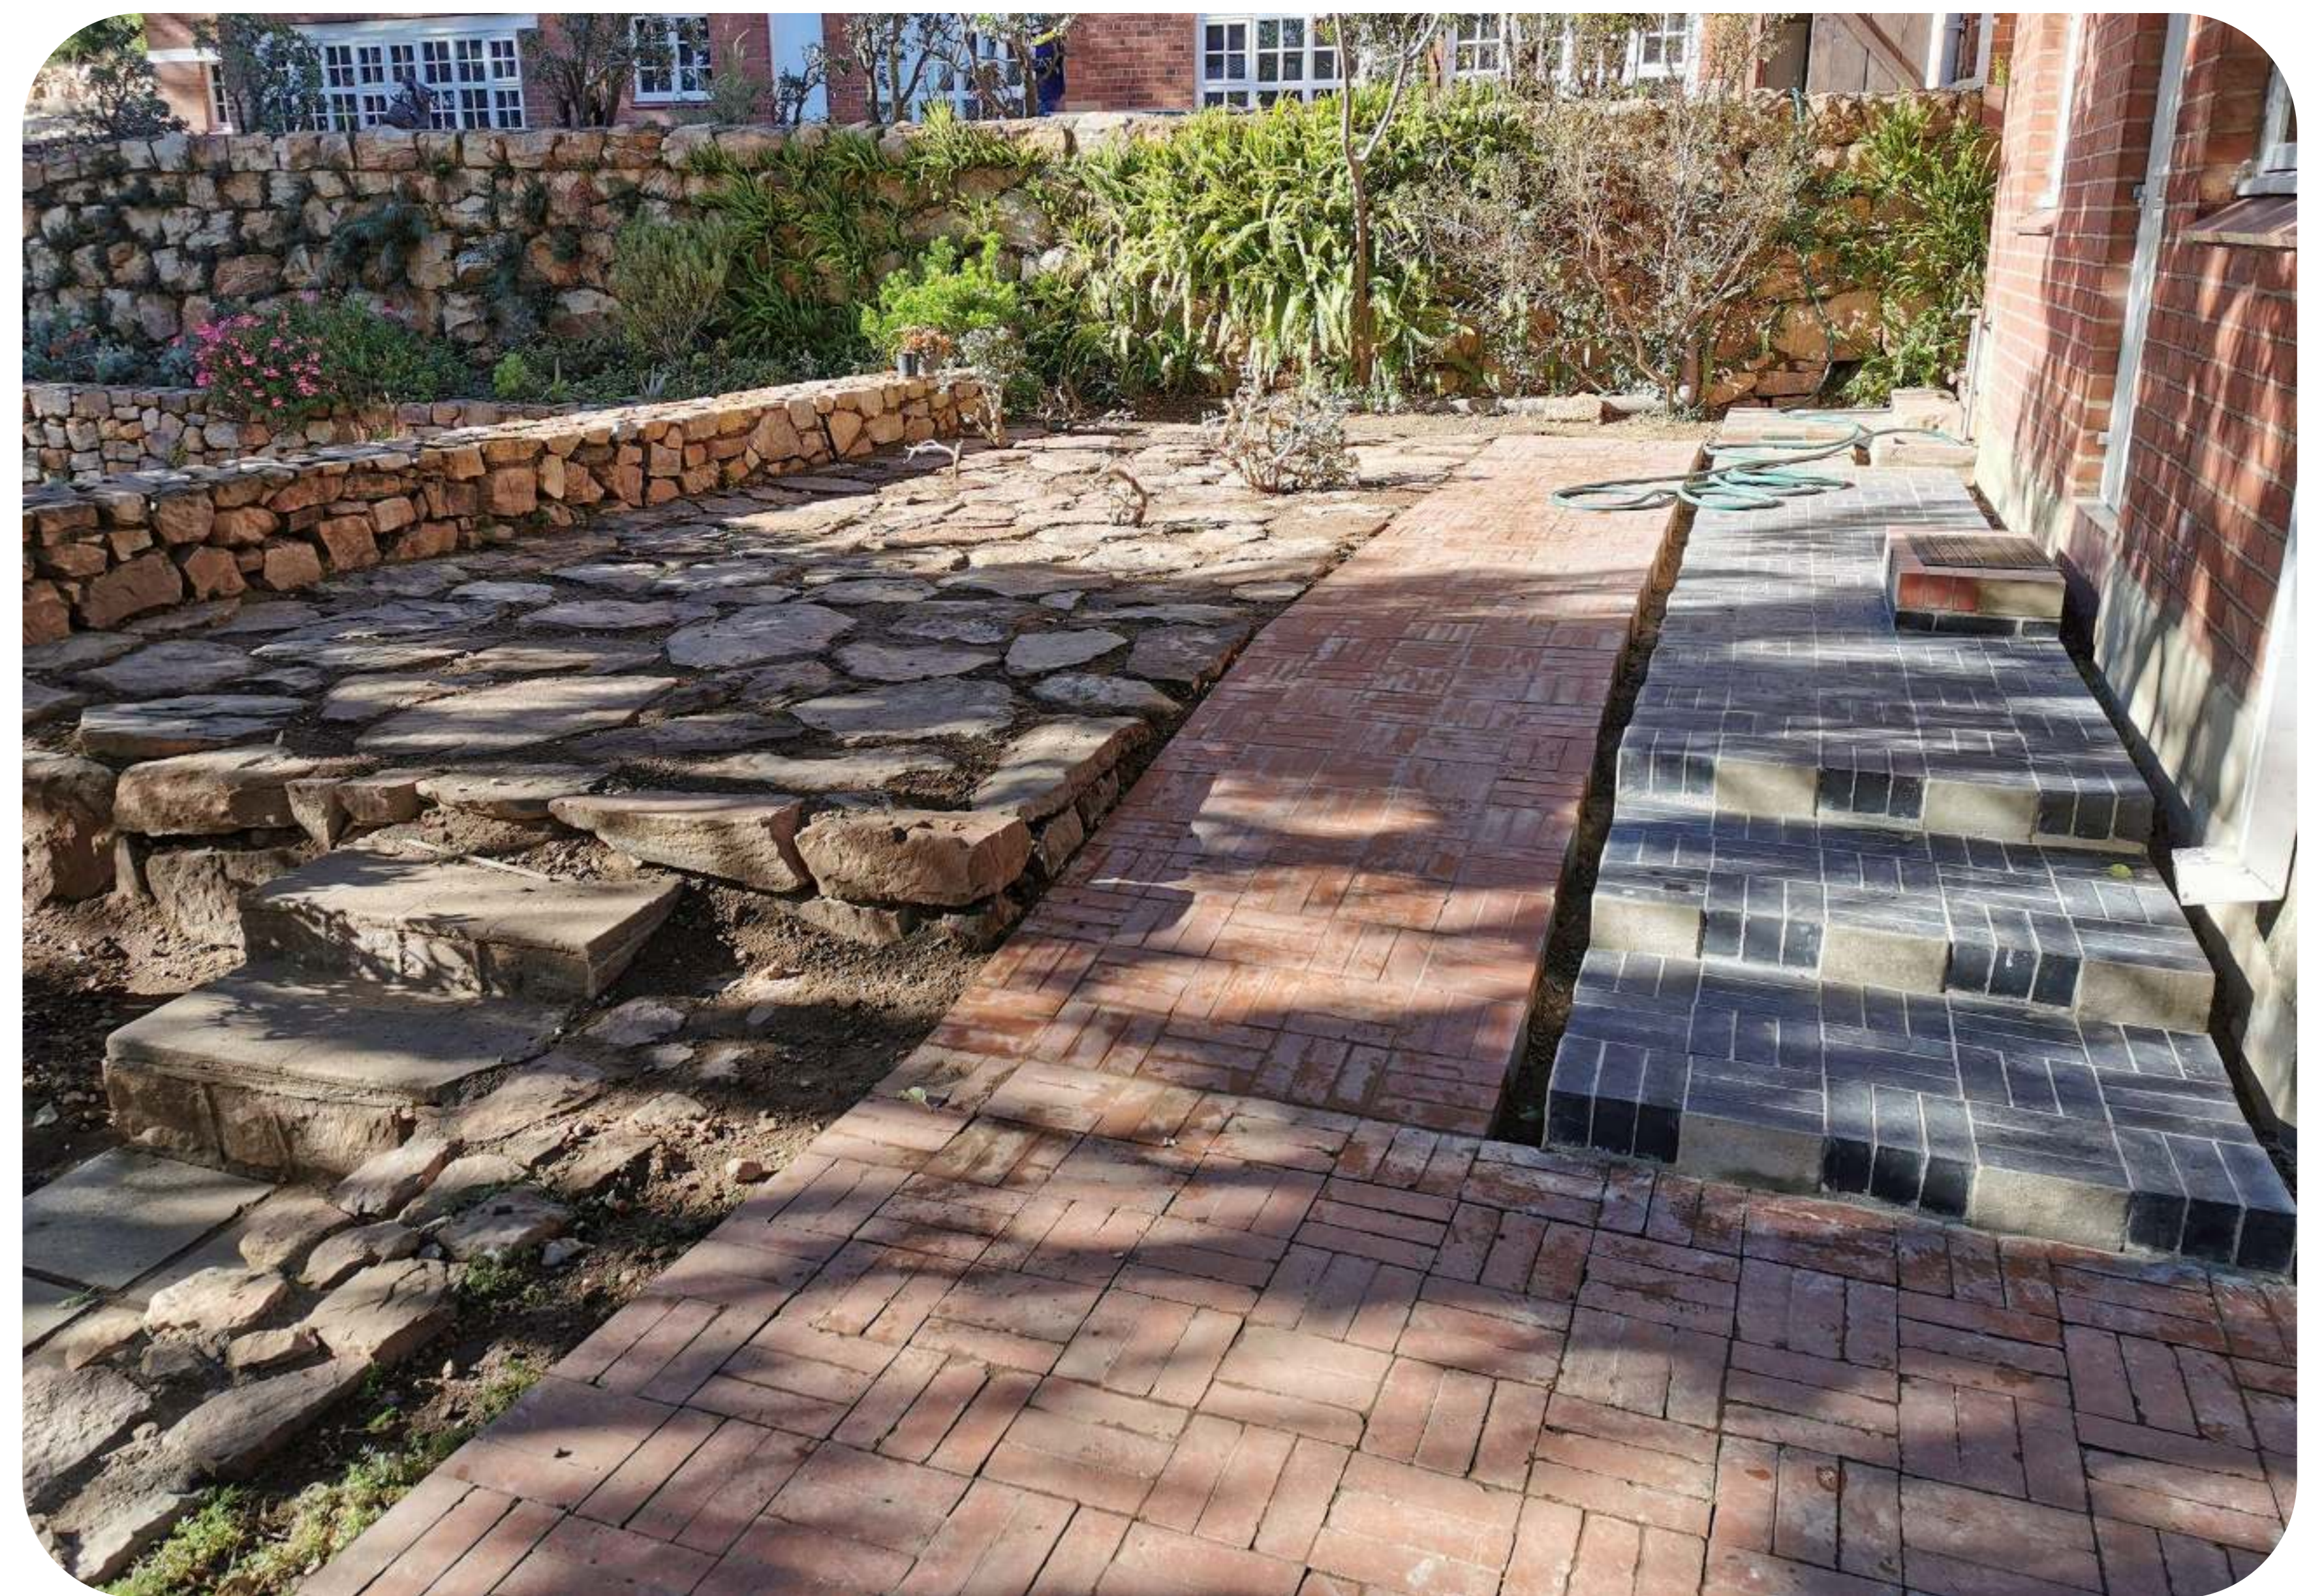

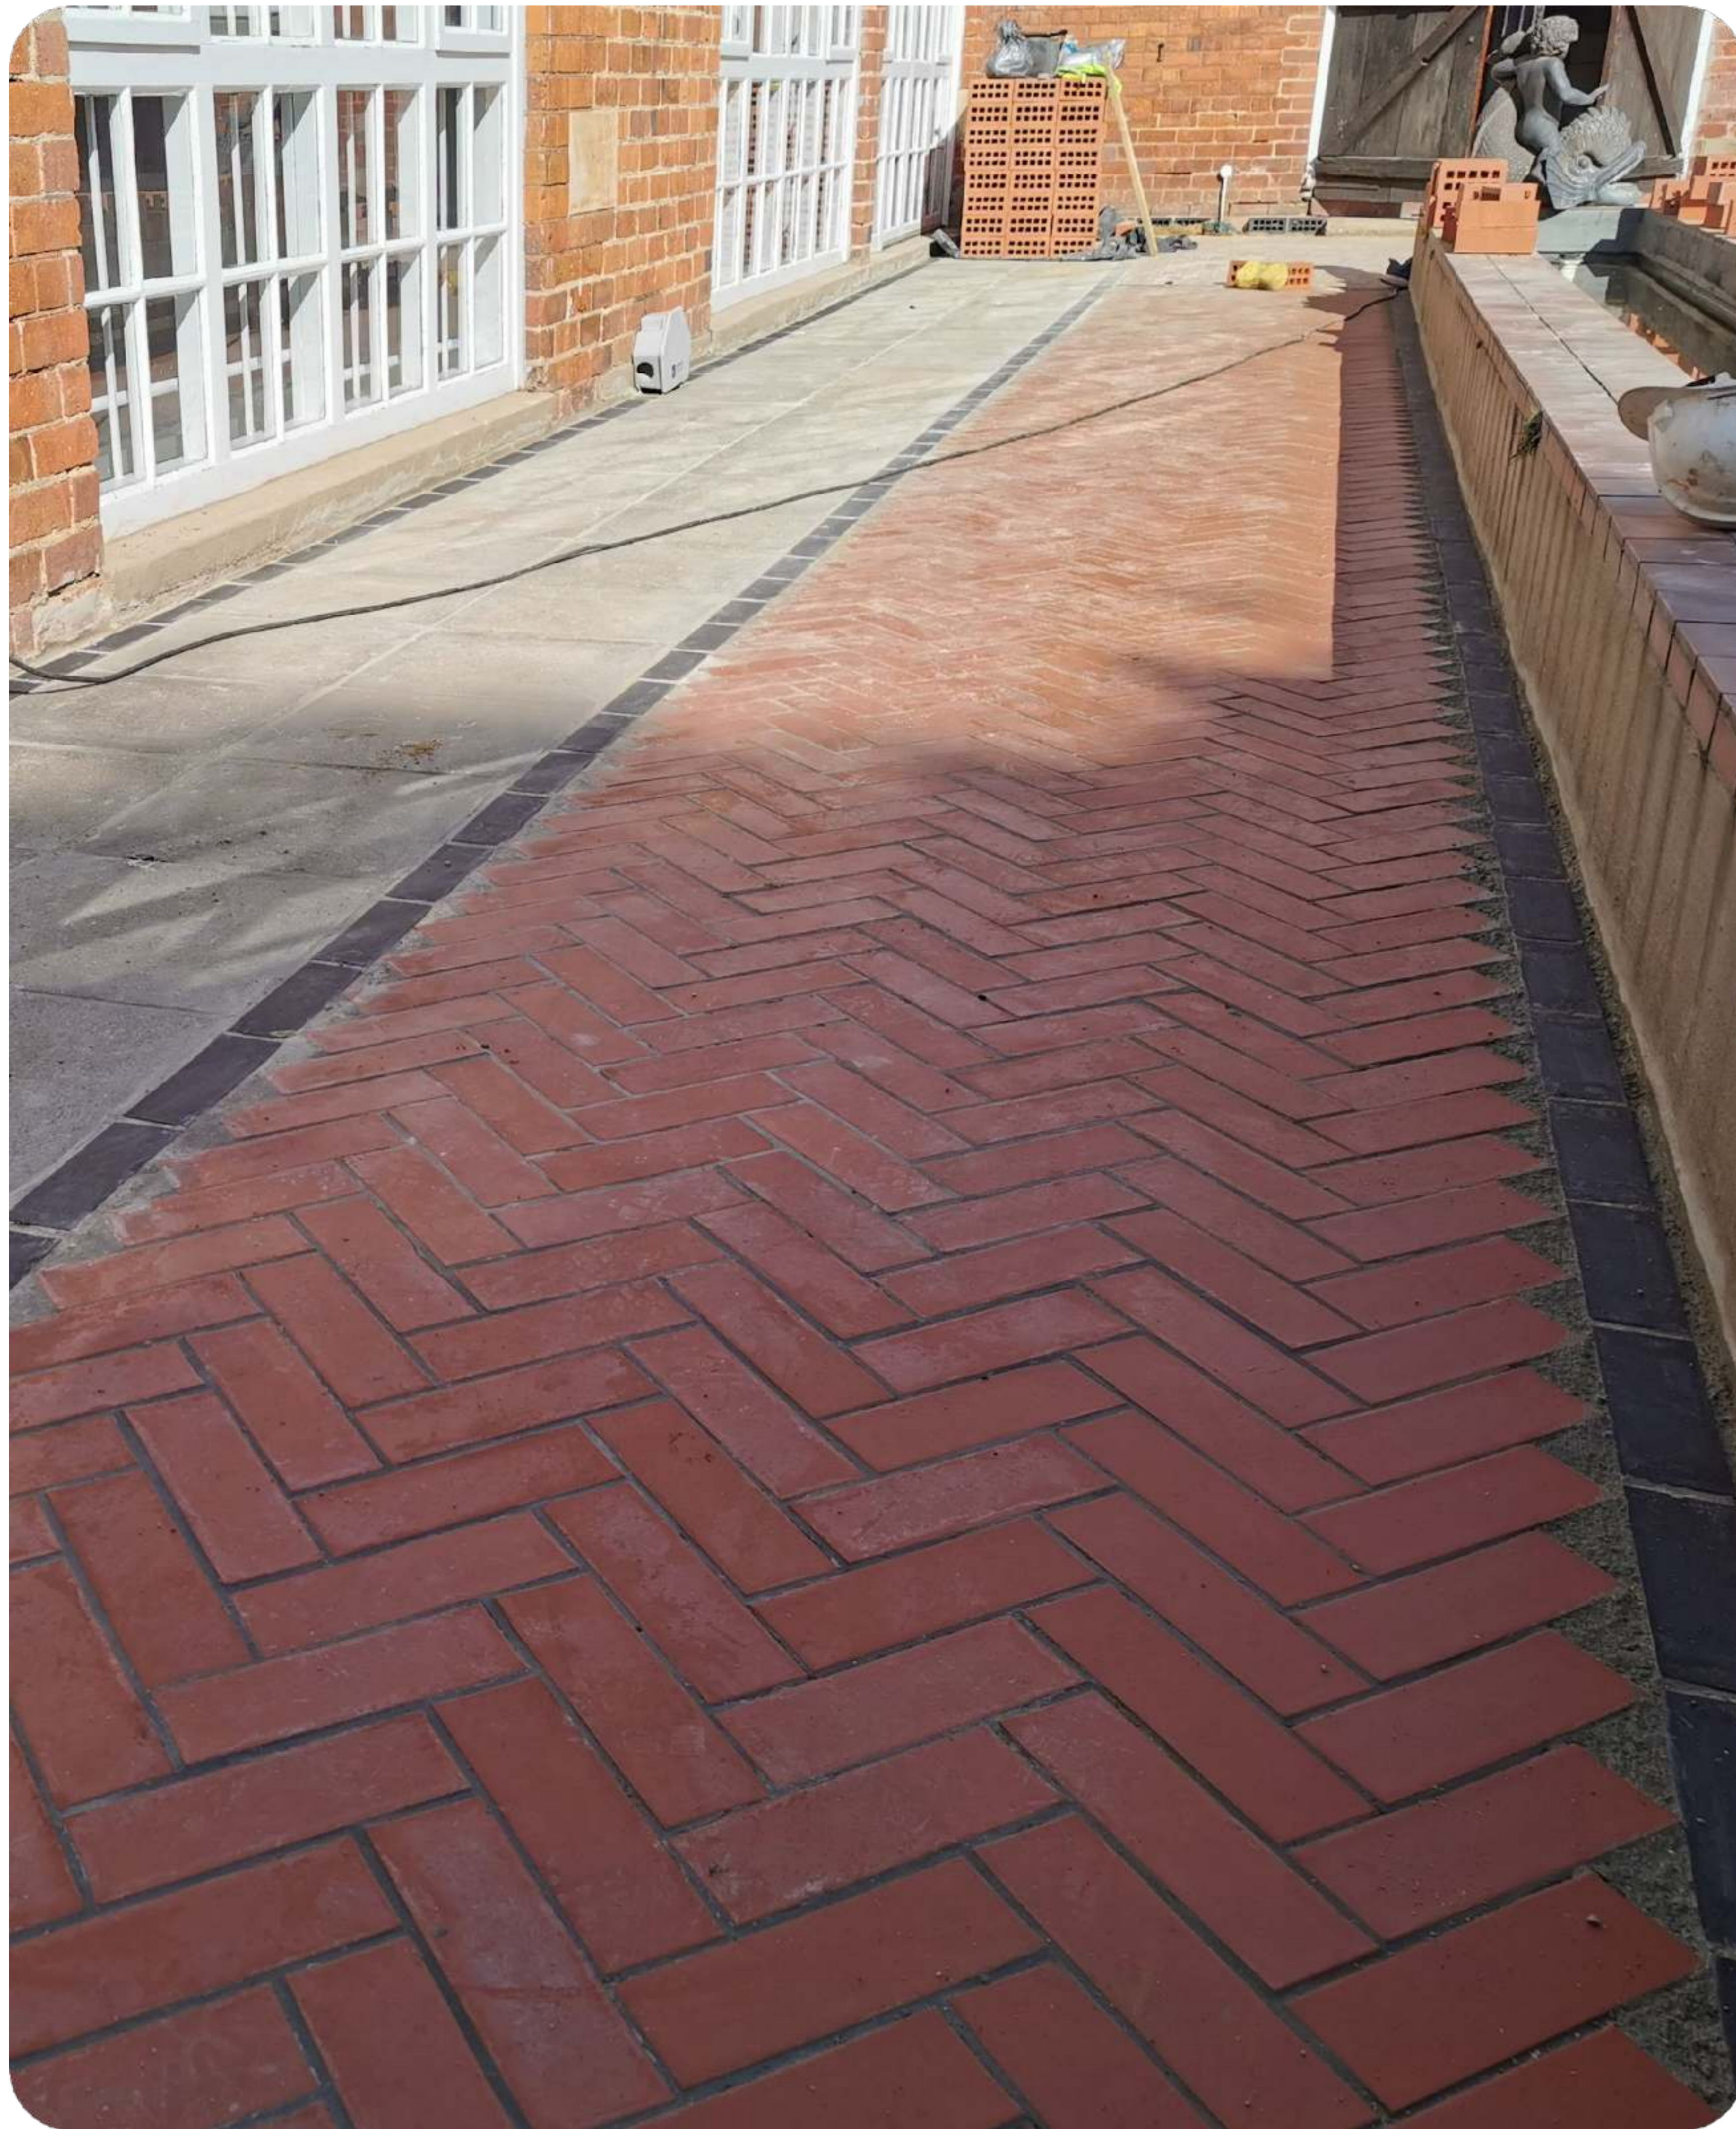

Planting after completion

- Seeding the berm for a lush and inviting lawn.
- Completion of the pond, filling it with water.
- Planting of water lilies and grasses around the water edge, creating a harmonious blend of nature.

Various Projects
Paving

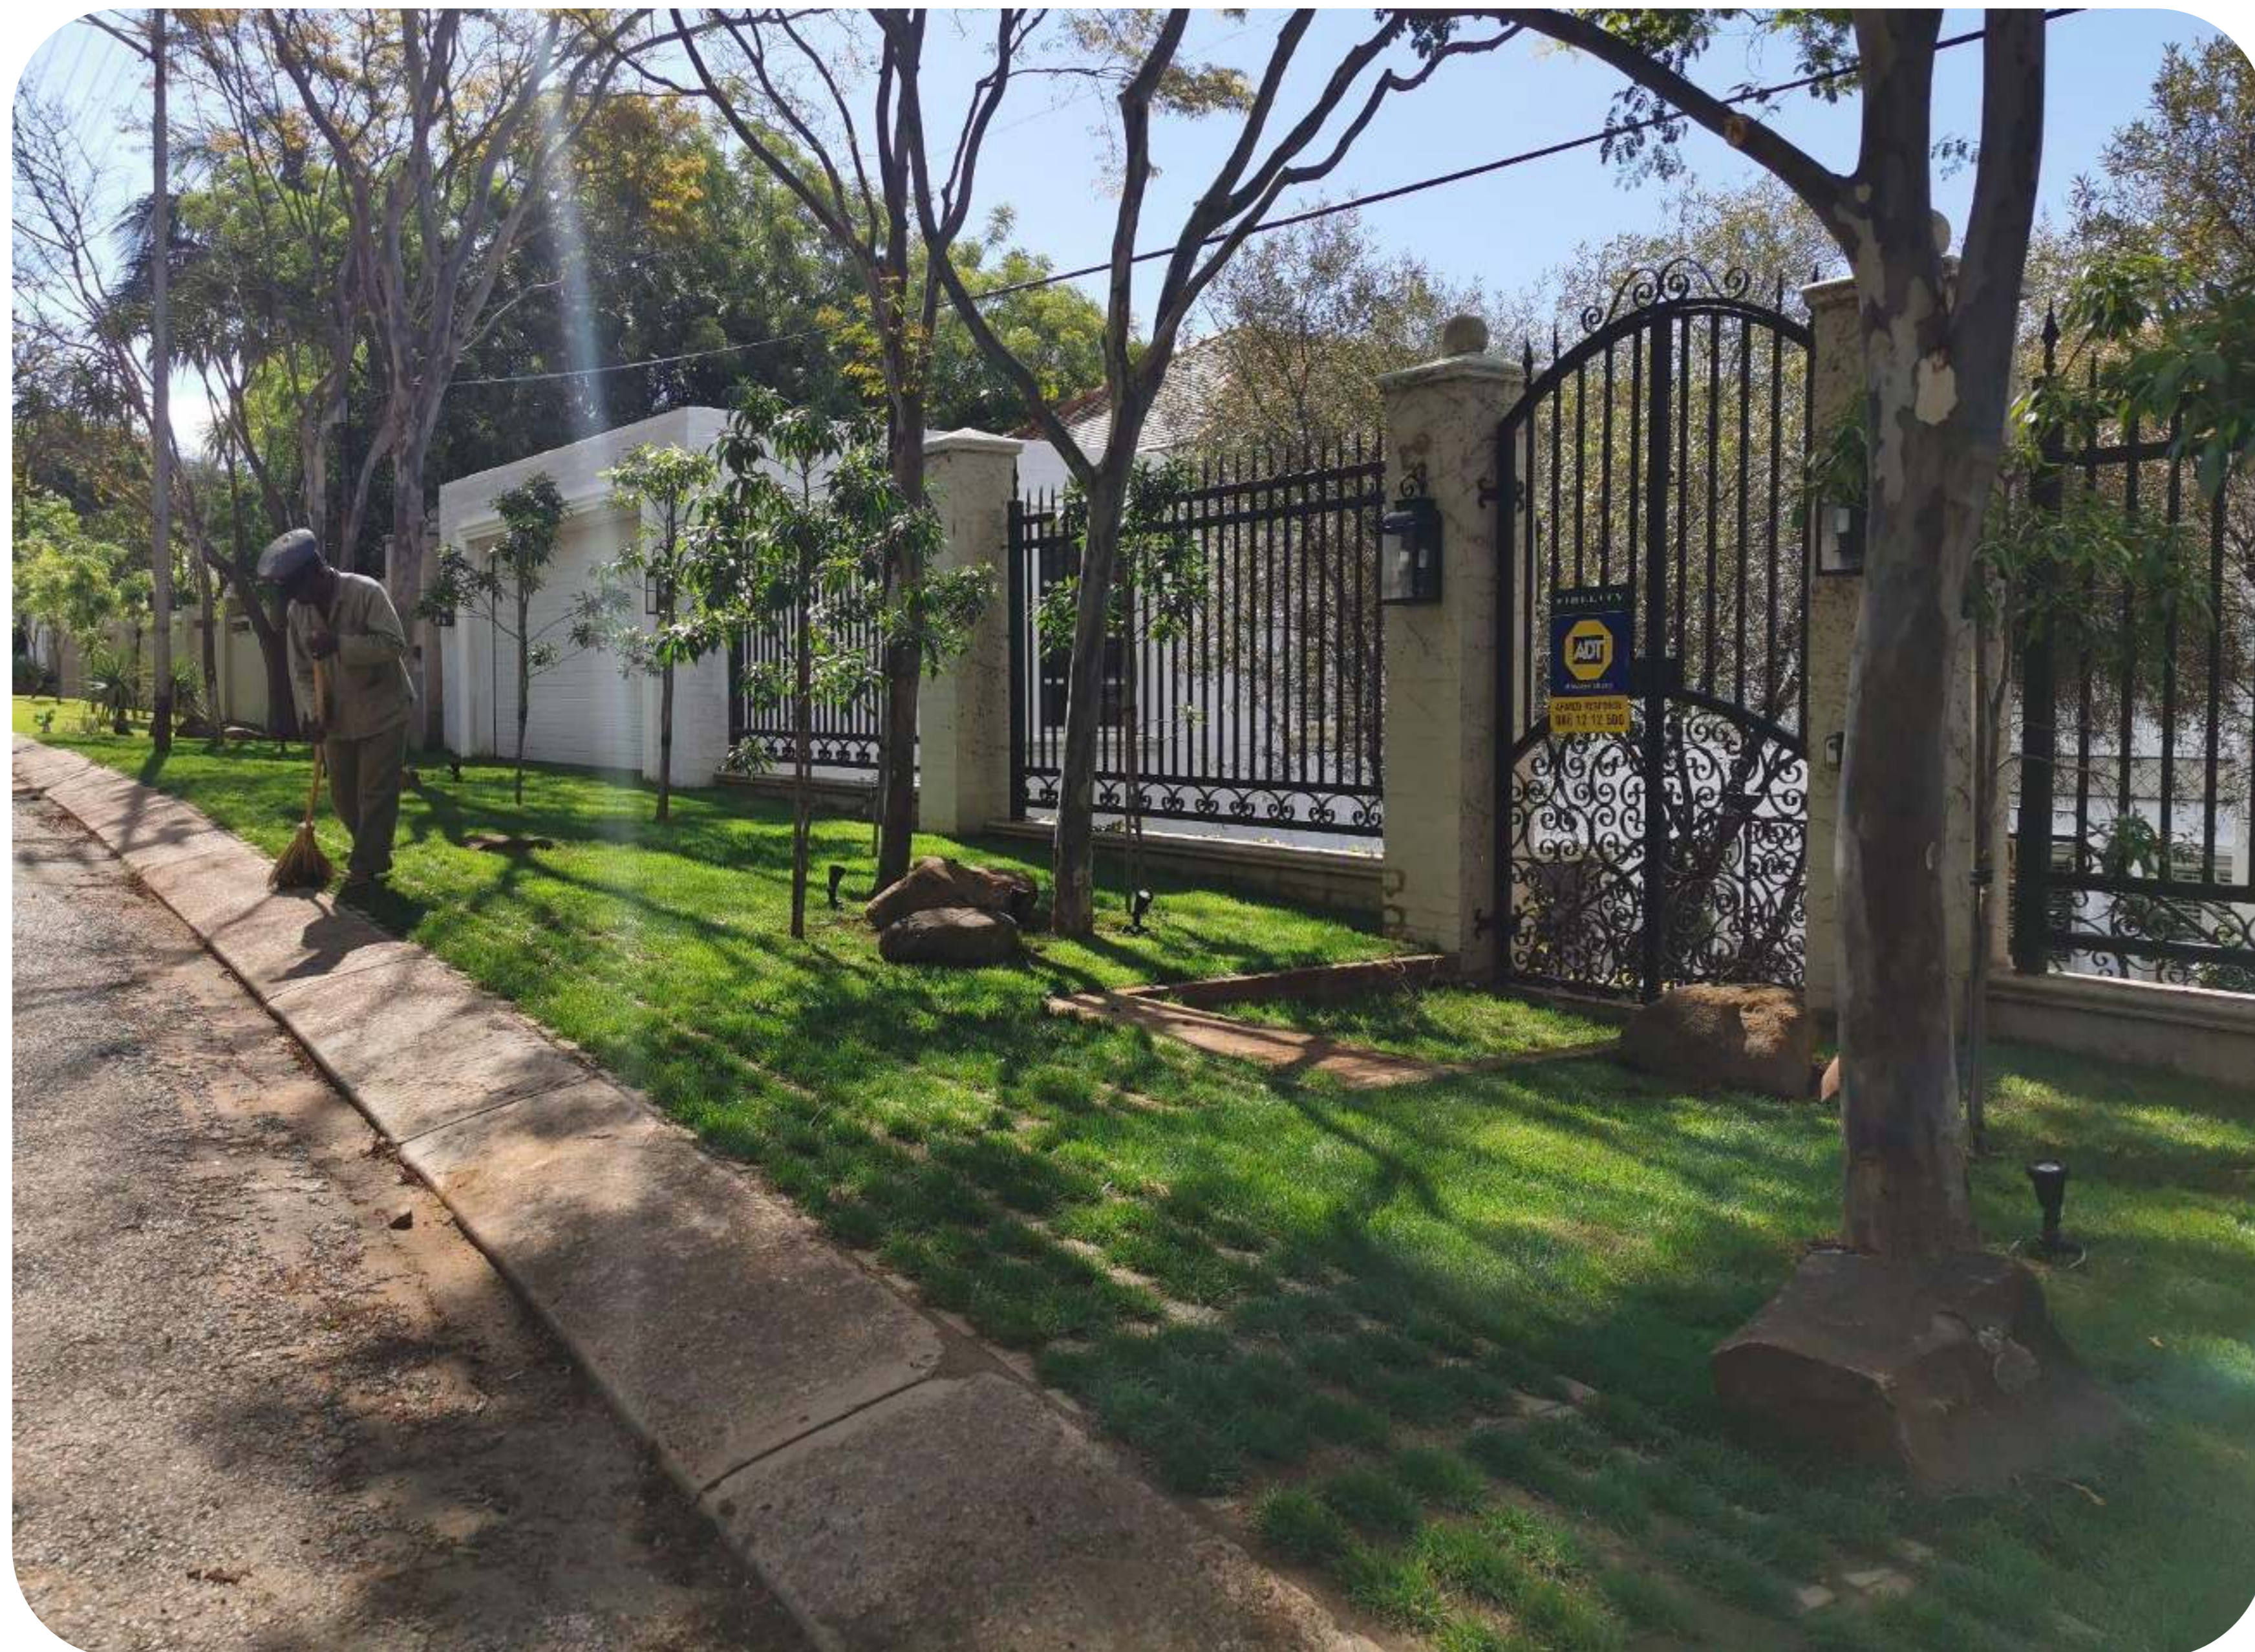

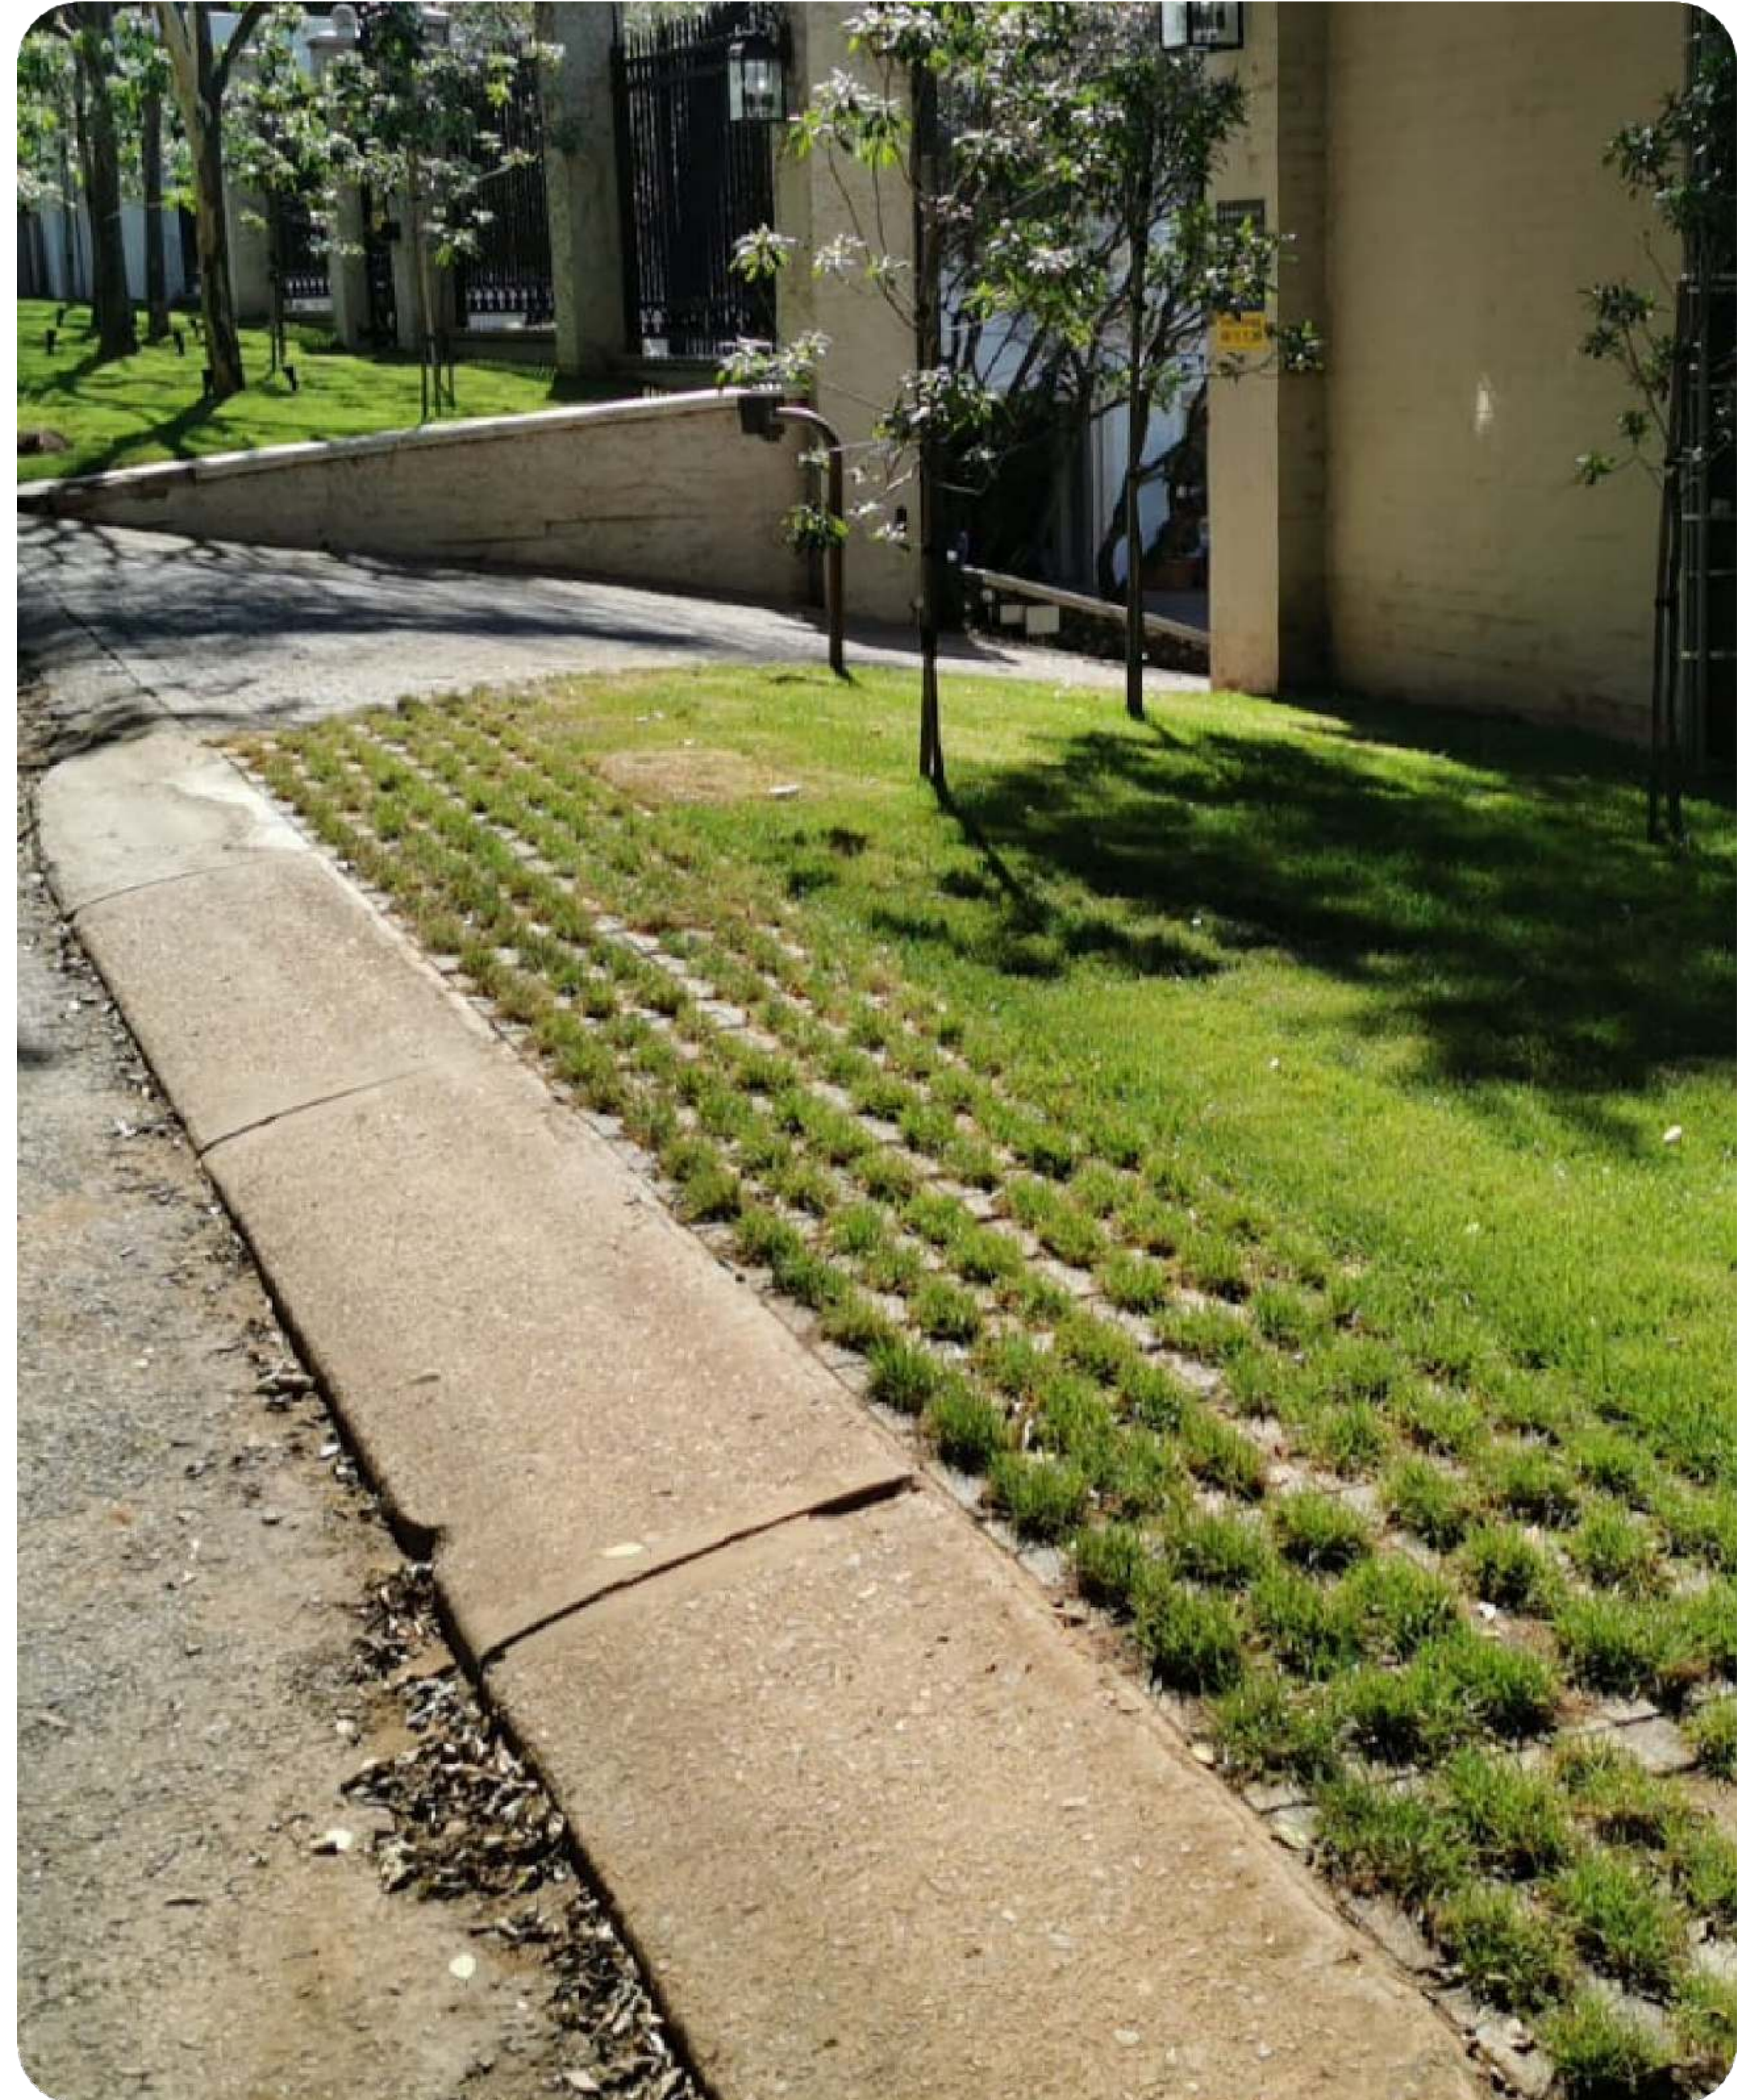

Appointed subcontractor

Private client

Grass-block borders and Lawn

Appointed subcontractor

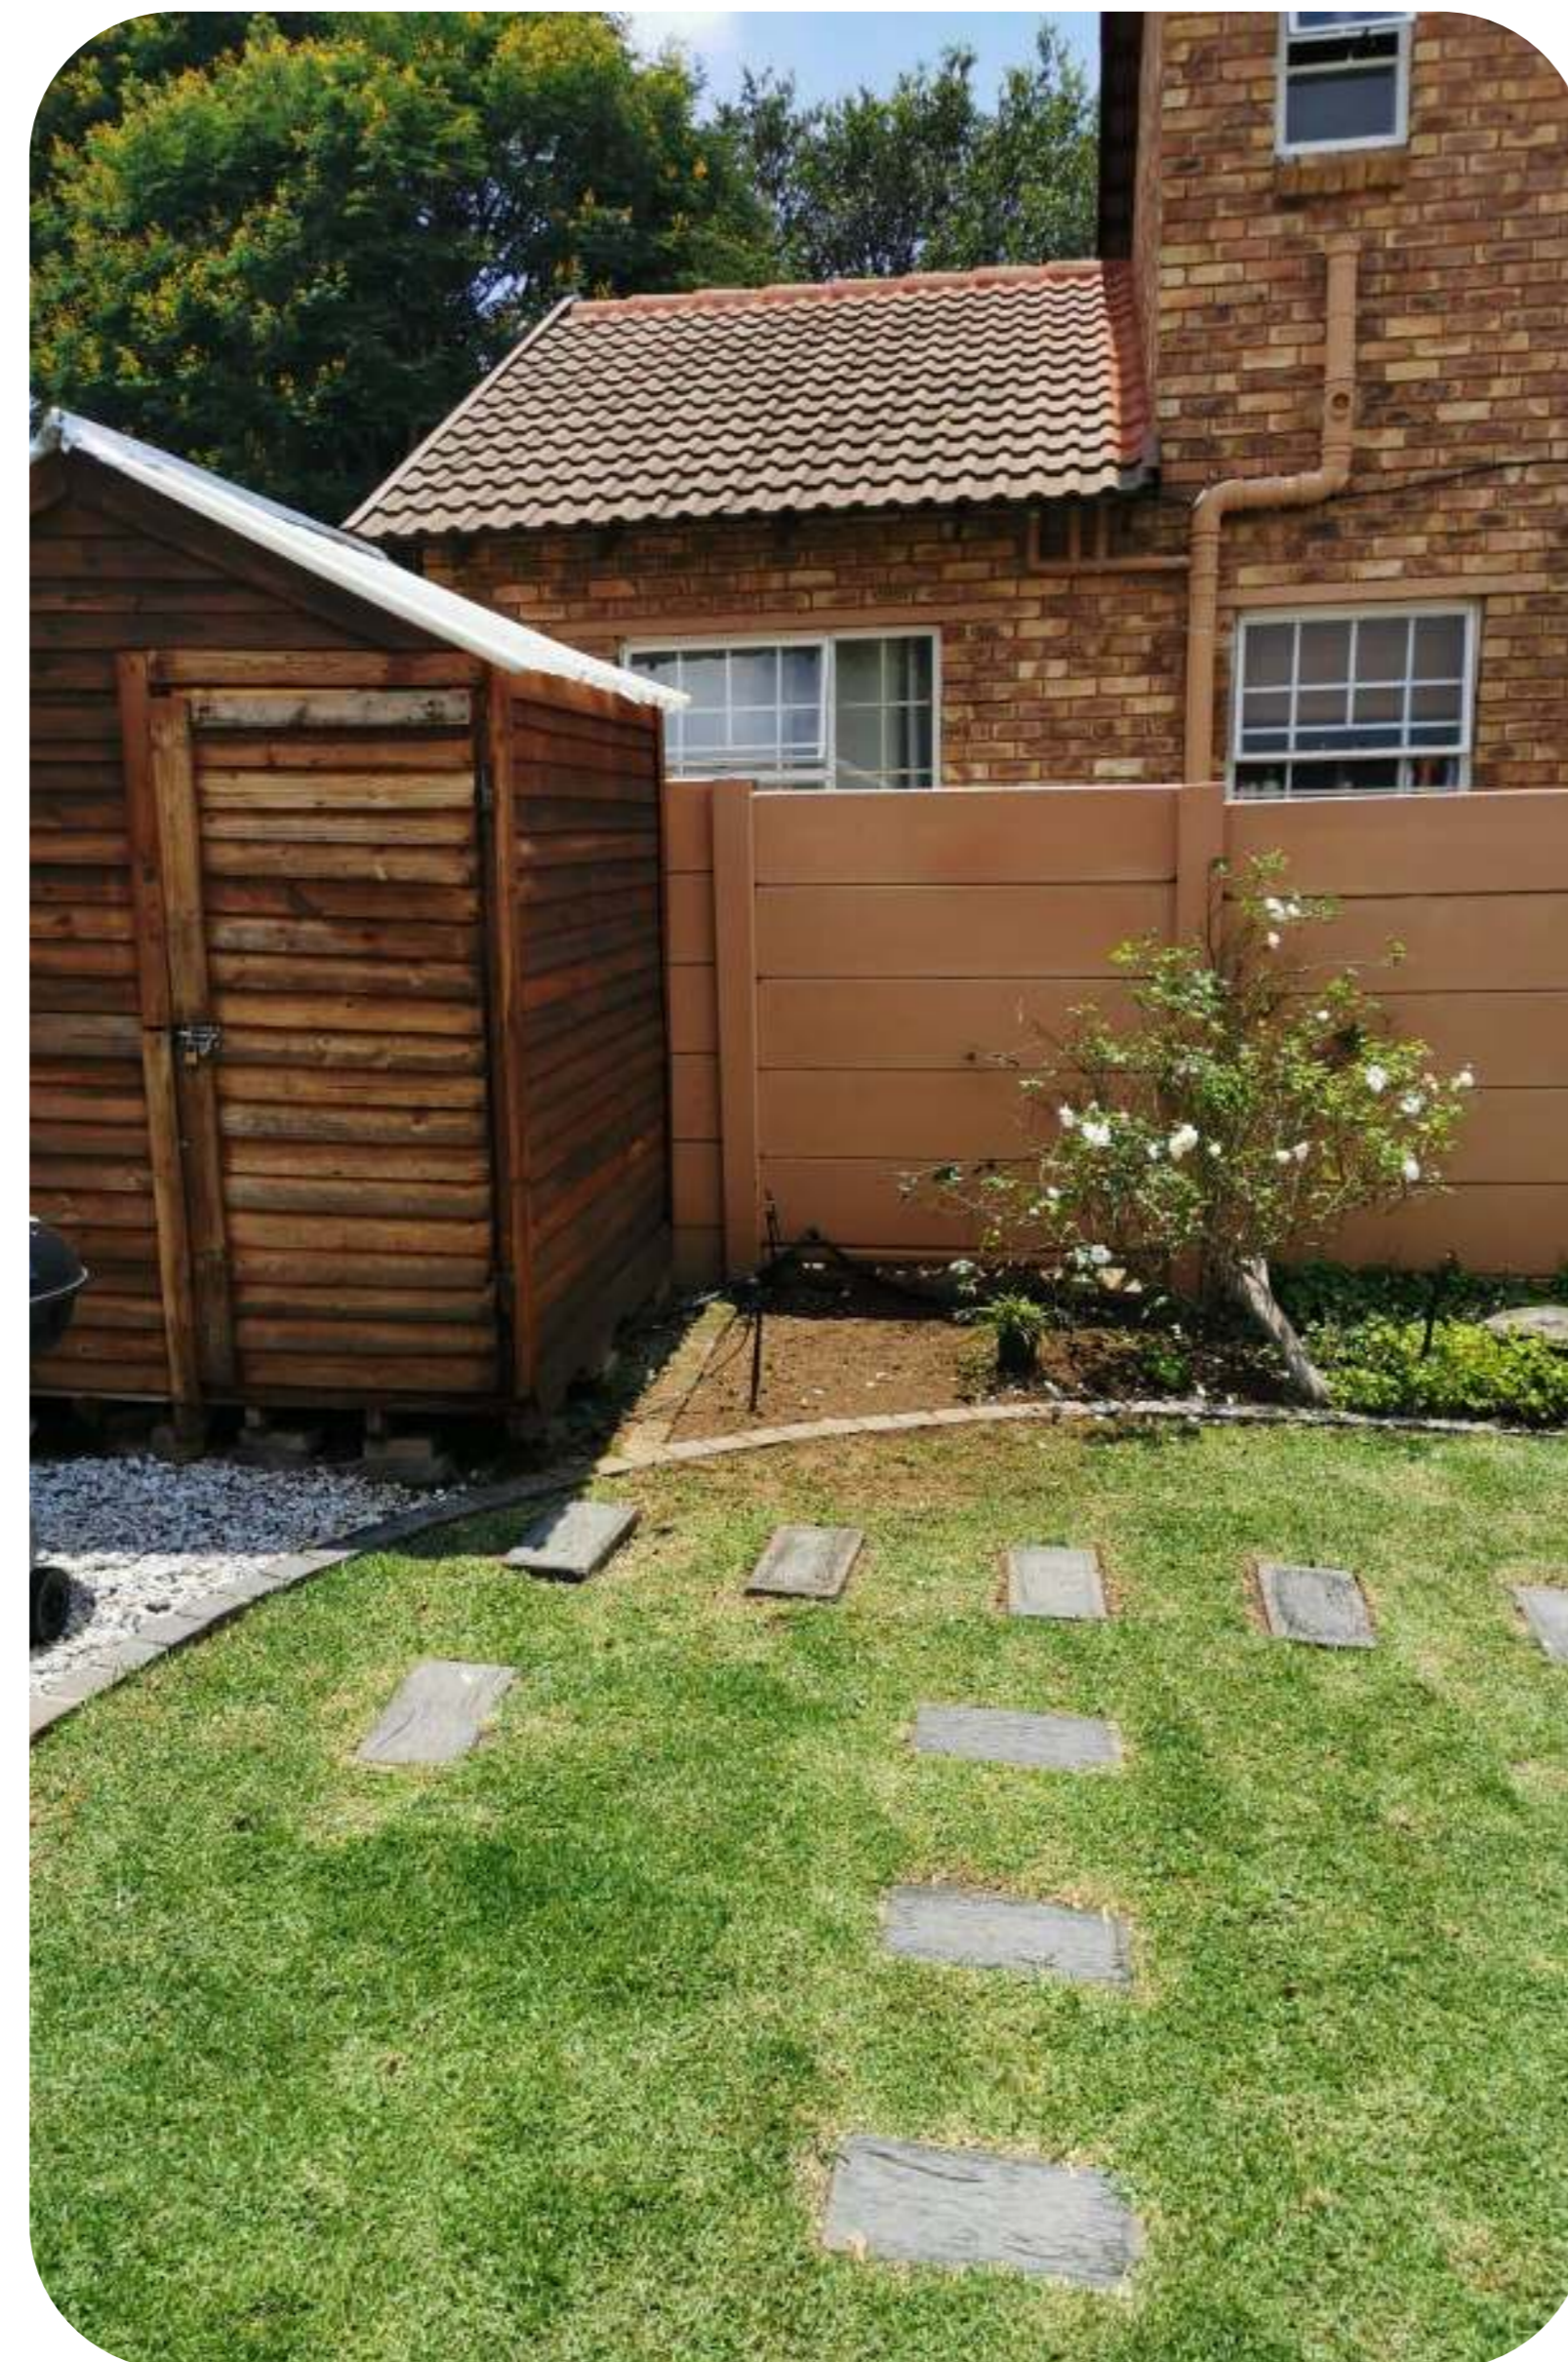

Private client

Tree felling, Removal & Maintenance

Independent contract

Tree removal

- **Left:** Before tree removal.
- **Right:** The tree was expertly cut into sectional pieces, and its roots were attentively removed.
- Our comprehensive service encompasses the removal of all natural materials and thorough cleanup.

Tree Maintenance

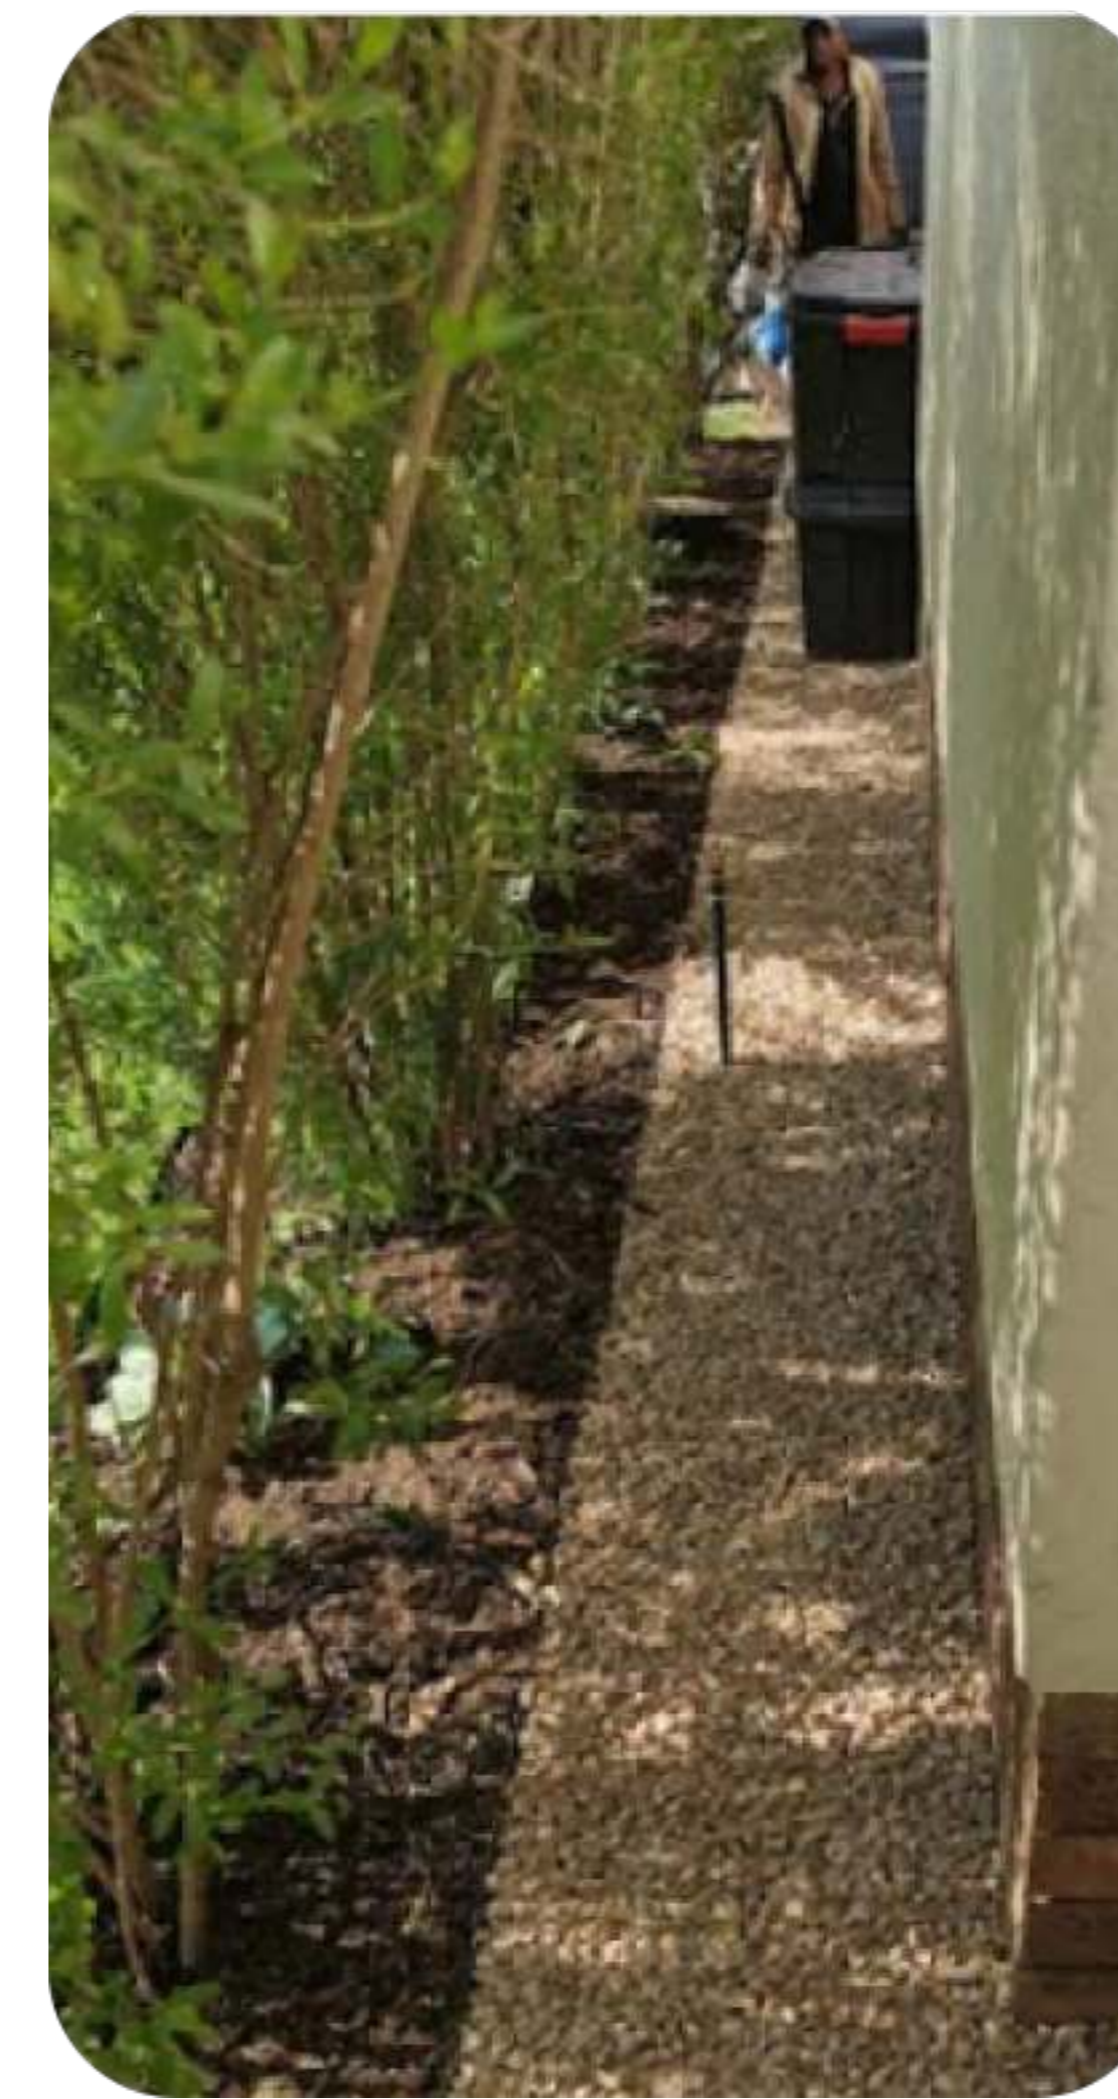

- **Left:** Tree before foliage trim.
- **Right:** The tree has been pruned away from the structure and shaped according to the client's specifications.

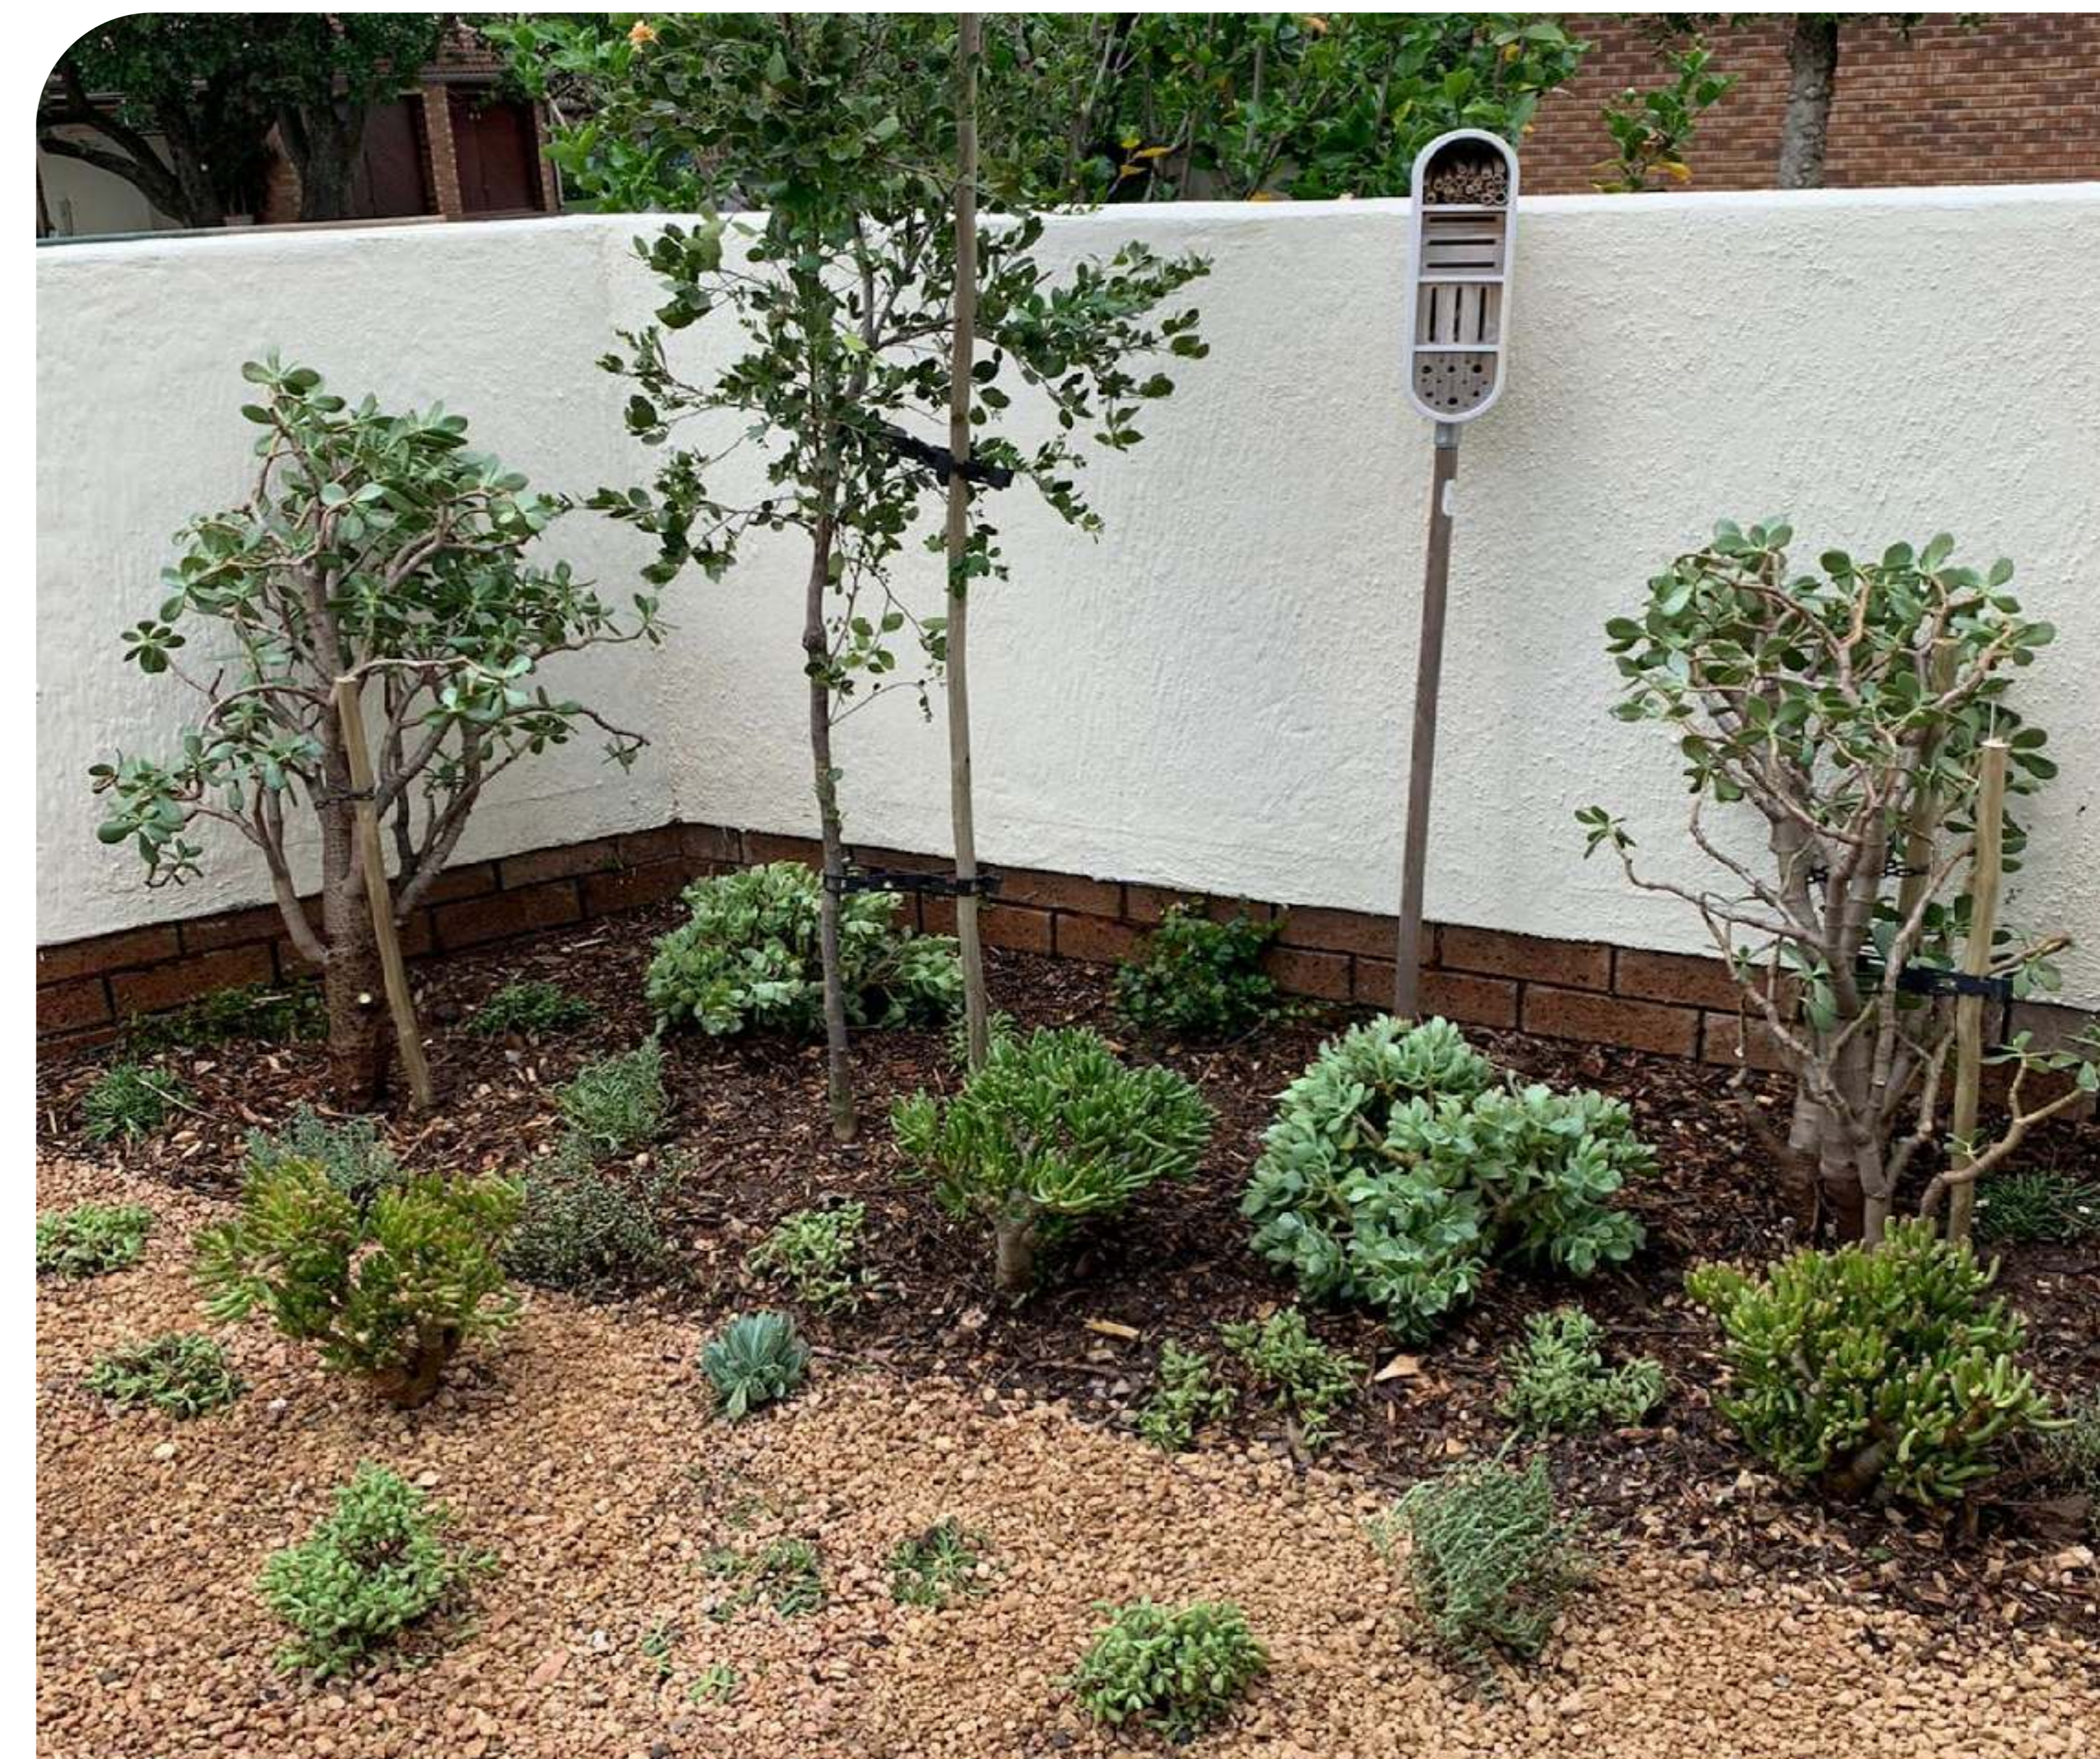

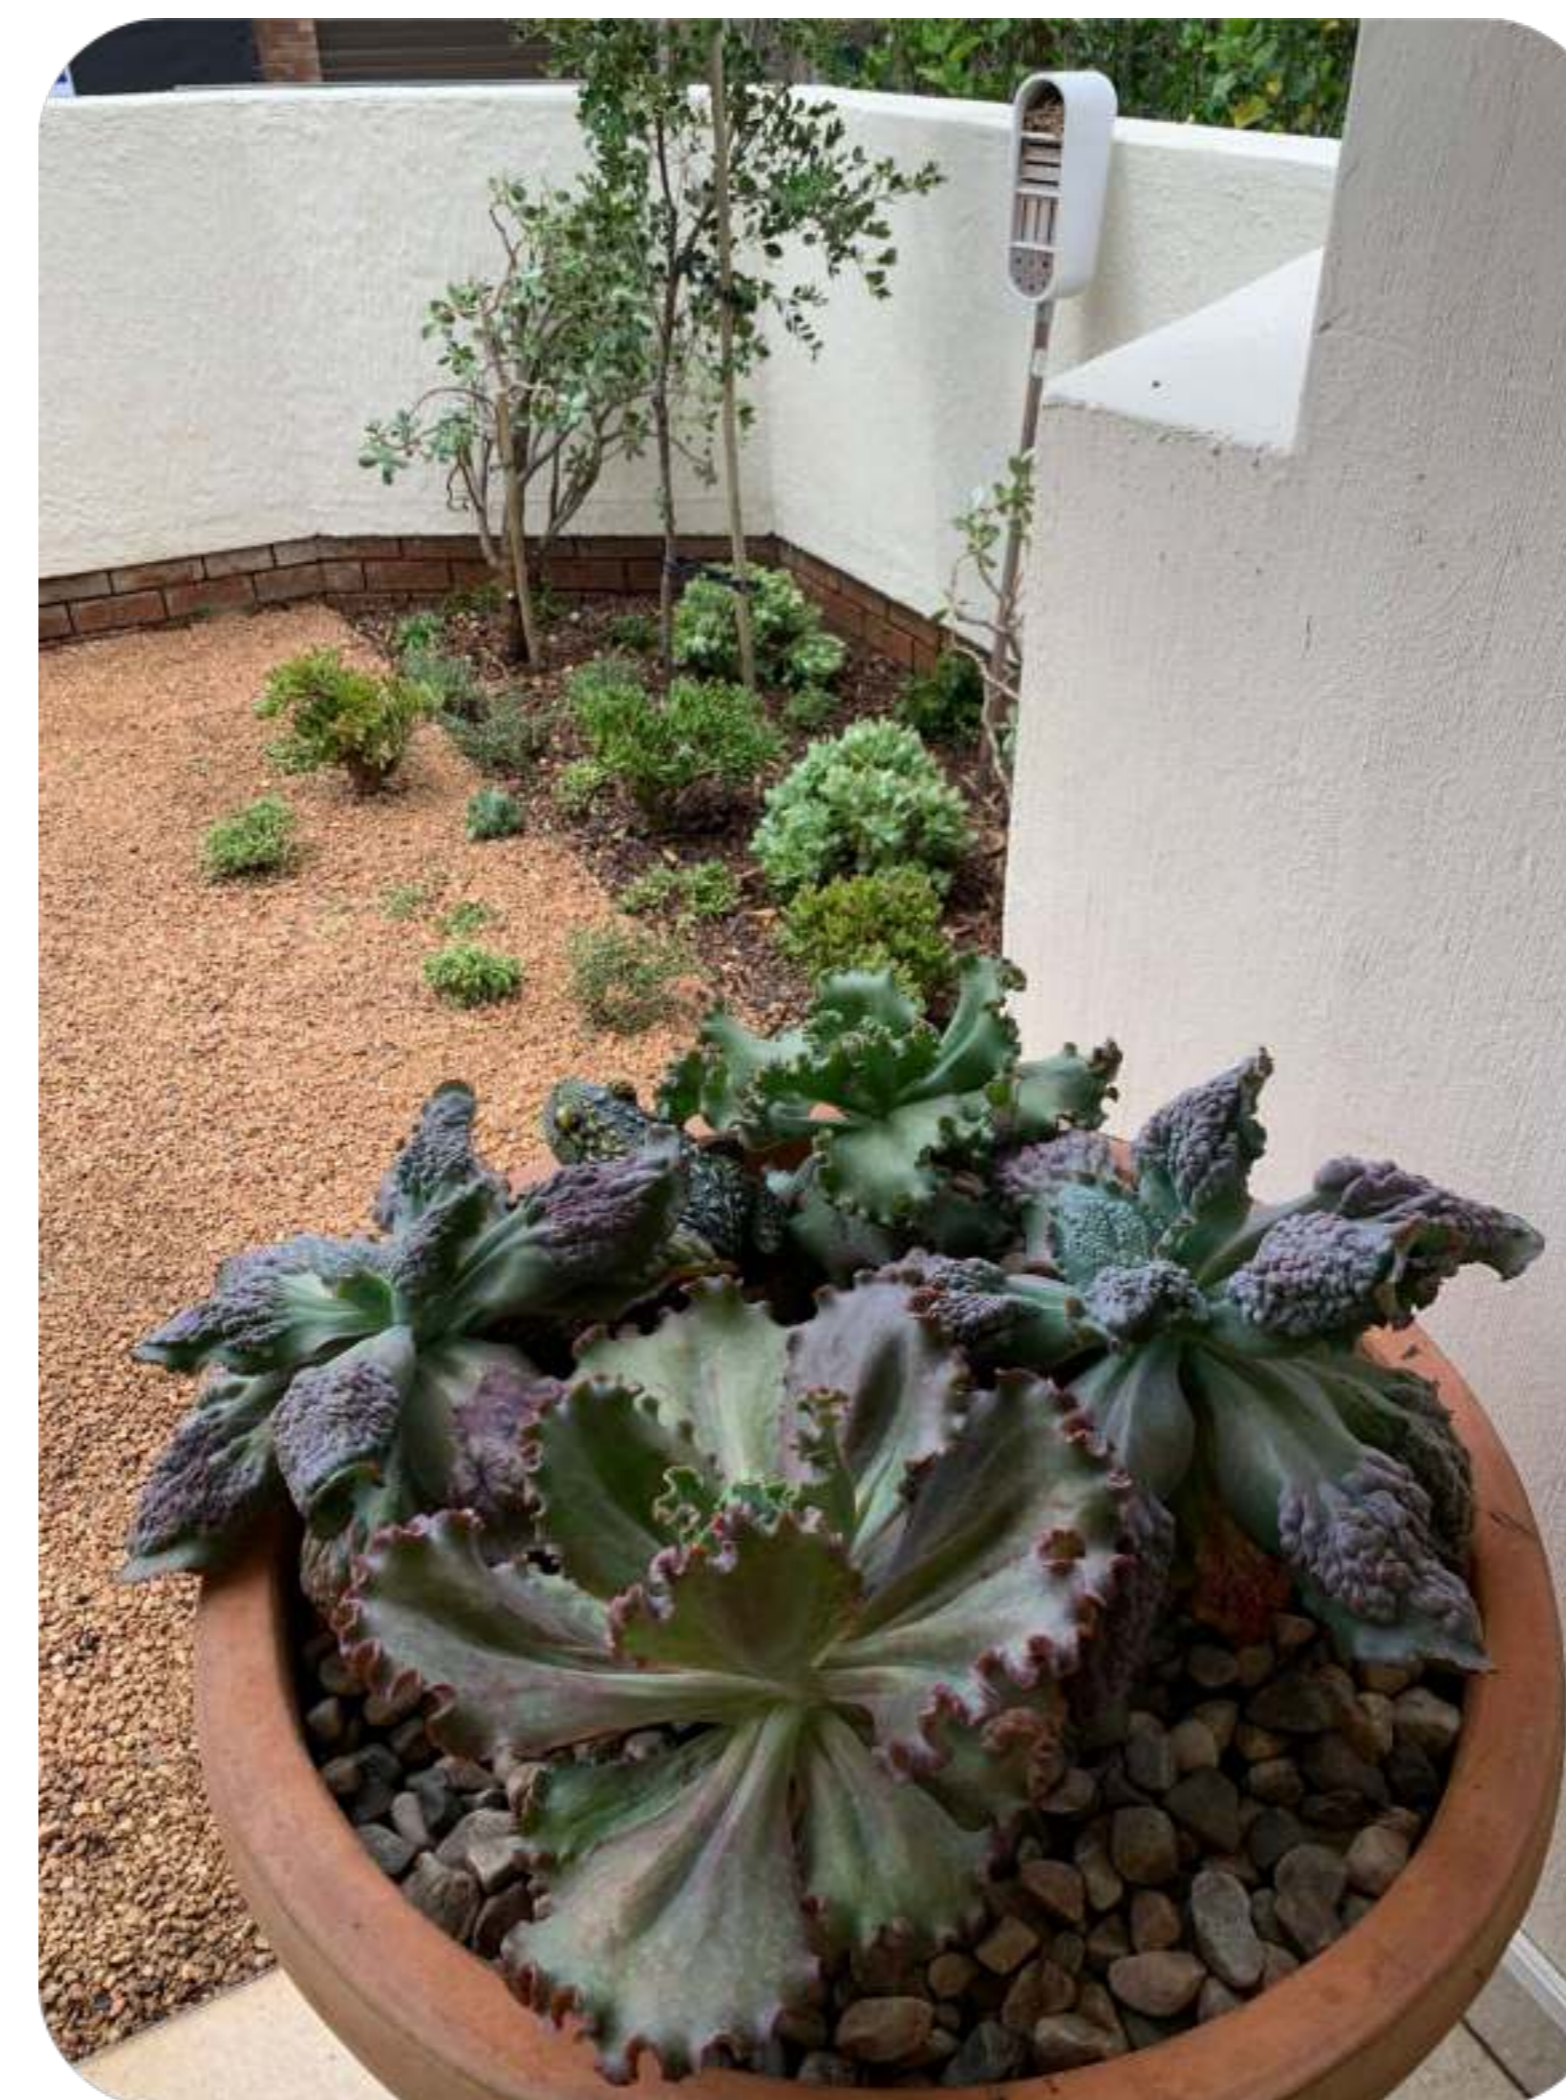

Private client

Succulent garden including drainage

Independent contract

- Excavation of the existing soil layer for the installation of a French drain, catering to the water preferences of succulents that thrive in well-drained conditions.
- Placement of 'Bidim' cloth to facilitate the laying of gravel and the strategic planting of succulents.
- Creation of leveled gravel walkways around the house, incorporating stepping stones with slate at the Kitchen entrance and in the back garden.

Private client

Lanseria Private Property

Appointed subcontractor

- Site cleanup and expert removal of trees.
- Ground level buildup for terrace construction.
- Installation of French drainage to ensure optimal drainage in the grassy area near the main house.
- Planting of resilient 'Kweek' grass to enhance the landscape.
- Artful exposure of natural rock for the creation of captivating rock gardens.
- Construction of a durable stone wall complemented by well-designed concrete walkways.
